SUMMARY ANALYSIS

The Florida Retirement System (FRS) is a multi-employer, contributory plan that provides retirement benefits to 623,011 active members and 333,870 retired members and beneficiaries, and 40,556 members of the Deferred Retirement Option Program. It is the primary retirement plan for employees of the state and county government agencies, district school boards, state colleges and universities. The FRS also serves as the retirement plan for employees of cities and independent special districts that have made an irrevocable election to participate.

Members of the FRS have two plan options available for participation: the defined benefit plan, also known as the pension plan; and the defined contribution plan, also known as the investment plan.

Section 121.031, F.S., requires that an annual actuarial study of the FRS be provided by the administrator of the system (the Department of Management Services) and for the results to be reported to the Legislature by December 31 of each year. Thereafter, the Legislature uses the report in establishing the uniform contribution rates in law during the next regular legislative session.

Effective July 1, 2013, the bill:

- Revises s. 121.71 to adjust the employer contribution rates for the FRS based on the 2012 Actuarial Valuation.

The bill conforms the law to the proposed House of Representative 2013-14 General Appropriations Act (GAA) as retirement contributions are included in the GAA.

The bill provides that a proper and legitimate state purpose is served, which includes providing benefits that are managed, administered, and funded in a sound actuarially sound manner.

The bill has a significant negative fiscal impact to the state and local governments: \$498.6 million in General Revenue (state, district school boards, state colleges and universities), \$311.3 million to local governments (county agencies, certain municipalities and special districts.)

I. SUBSTANTIVE ANALYSIS

A. EFFECT OF PROPOSED CHANGES:

Background

Florida Retirement System

The Florida Retirement System (FRS) was established in 1970 when the Legislature consolidated the Teachers' Retirement System, the State and County Officers and Employees' Retirement System, and the Highway Patrol Pension Fund. In 1972, the Judicial Retirement System was consolidated into the pension plan. Prior to 1975, members of the FRS were required to make employee contributions. Regular Class members contributed four percent of their salary while Special Risk Class Members contributed six percent. The 2011 Legislature reinstituted employee contributions whereby all Class members contribute three percent of their salary.

The Florida Retirement System Act ¹ governs the FRS, which is a multi-employer, contributory plan that provides retirement income benefits to 623,011 active members, 333,870 retirees and 40,556 members of the Deferred Optional Retirement System (DROP)². It is the primary retirement plan for employees of the state and county government agencies, district school boards, community colleges and state universities. The FRS also serves as the retirement plan for 185 municipalities and 251 independent special districts that have irrevocably elected to participate³.

The membership of the FRS is divided into five membership classes⁴:

- Regular Class⁵: 543,195 members (87.0 percent)
- Special Risk Class⁶: 70,005 members (11.29 percent)
- Special Risk Administrative Support⁷: 59 members (0.01 percent)
- Elected Officer Class⁸: 2,206 members (0.35 percent)
- Senior Management Services Class⁹: 7,546 members (1.21 percent)

Each class is funded separately based upon the costs attributable to the members of the class.

Members of the FRS have two plan options available for participation:

- The defined benefit plan, also known as the pension plan.
- The defined contribution plan, also known as the investment plan.

Investment Plan

In 2000, the Legislature created the Public Employee Optional Retirement Program (Investment Plan), a defined contribution plan offered to eligible employees as an alternative to the FRS defined benefit plan. The investment plan was available for participation as of July 1, 2002.¹⁰ Benefits under the investment plan accrue in individual member accounts funded by employer and employee contributions. Investments are employee-directed into State Board of Administration (SBA) approved investment providers. Members

of the investment plan contribute three percent of their salaries to their accounts¹¹. The remainder of the allocation comes from employer contributions.

A member vests in the investment plan after one-year with an FRS employer. Vested benefits are payable upon termination of employment or death as a lump-sum distribution, roll-over distribution, or periodic distribution. The investment plan also provides disability benefits, which is essentially an option to collect disability benefits as provided in the defined benefit plan.

The SBA is primarily responsible for administering the investment plan.¹² The SBA is comprised of the Governor as chair, the Chief Financial Officer and the Attorney General.

Pension Plan (Defined Benefit Plan)

The pension plan is administered by the secretary of the Department of Management Services through the Division of Retirement. Investment management of retirement funds is handled by the State Board of Administration.

Participants of the pension plan are required to contribute three percent of their salary.¹³

Contribution Rates

FRS employers are responsible for contributing a percentage of a member's monthly salary to the FRS Contributions Clearing Account Trust Fund in the Division of Retirement to fund the program. The employer contribution is a "blended contribution rate" set by statute¹⁴, as amended by the Legislature based on an annual actuarial valuation. The rate consists of a blending of the actuarially determined contribution rates necessary to fund the pension plan's normal cost and the allocations being made into investment plan accounts. The purpose of the blending is to establish the same employer contribution rates regardless of whether an employee participates in the pension plan or the investment plan.

Effects of the Bill

The bill establishes the employer contribution rates for the normal costs and the unfunded actuarial liability (UAL) of the FRS, as determined by the July 1, 2012 Annual Valuation, necessary to adequately fund the program. The normal and UAL rates were 'blended' with the investment plan allocations and salaries to establish employer contribution rates. The proposed employer contributions for fiscal years 2013-2014, compared to rates currently in effect, are contained in the table below.

Proposed and Current FRS Employer Contribution Rates¹⁵

III. COMMENTS

A. CONSTITUTIONAL ISSUES:

1. Applicability of Municipality/County Mandates Provision:

The mandates provision appears to apply because this bill requires counties and/or cities to spend money or take action that requires the expenditure of money; however, an exception applies as the Legislature has determined that this bill satisfies an important state interest. In addition, similarly situated persons are all required to comply.

2. Other:

B. RULE-MAKING AUTHORITY:

Not applicable.

C. DRAFTING ISSUES OR OTHER COMMENTS:

None.
